

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

SIMPLICITY

The Key Note of Lyman and Darnell's Elementary Algebra

Unduly puzzling exercises have been omitted

Non-essentials have been strictly eliminated

Preparation for difficulties has been made clear by explanations
of each new principle

Easy oral exercises help the pupil to understand the subject

Shows why algebra is a necessary study by providing problems
which apply algebra to everyday matters—agriculture, en-
gineering, commerce, physics, etc.

Meets College Entrance Board requirements

Authors: ELMER A. LYMAN, Professor of Mathematics, Michigan State Normal College, Ypsilanti, Mich., and ALBERTUS DARNELL, Head of Department of Mathematics, Central High School, Detroit, Mich.

WELLS AND HART'S ALGEBRA

Thirteen states adopt algebras for exclusive use in High Schools. Wells and Hart is the official book in eight of these states. No other algebra has more than one state adoption. The Wells and Hart Algebra has more state adoptions than all the other algebras combined.

WELLS AND HART'S GEOMETRY

Among the features of the Plane Geometry which have received unqualified praise are the following: (1) Its embodiment of pedagogical insight and experience; (2) its beginning with easy and practical matters; (3) the happy device by which a minimum course of exceptional clearness and utility is provided without detracting from the successful use of the book in meeting the exacting demands now made upon secondary school mathematics. The Solid Geometry continues in plan and method the work begun in the Plane Geometry. The complete book offers what geometry teachers have long sought but have not hitherto found.

WELLS AND HART'S NEW HIGH SCHOOL ARITHMETIC

In addition to providing for a brief and thorough review of the fundamental topics, the authors give prominence to industrial and commercial applications, such as automobile insurance, income and inheritance taxes, codes for marking goods, and scores of other modern ideas.

GALE AND WATKEYS'S

Elementary Functions and Applications

By ARTHUR S. GALE and CHARLES W. WATKEYS,
University of Rochester. (*Ready in May.*)

This freshman textbook includes plane trigonometry and parts of algebra, analytic geometry, and calculus, coherence being obtained by an analysis of relations between functions, tables of values, and graphs. Emphasis is placed upon the analysis of problems by means of graphs, and the applications include an outline of the theory underlying statistical methods. The book is intended primarily for freshmen who do not intend to specialize in mathematics, but it is also suitable as an introduction to more advanced mathematical courses. The text has been revised repeatedly in accordance with experience gained by using it in the class room for several years.

MORITZ' MEMORABILIA MATHEMATICA

COMMENTS

"The Memorabilia is consulted by me at more and more frequent intervals. I constantly turn to its pages both for information and also for recreation and seldom fail to find what I am looking for."—A Professor of Mathematics in one of the leading universities.

"I consider the 'Memorabilia' a worthy companion to my 'Ahrens.'"—A Professor of Astronomy in one of the Canadian universities.

"Truly your Memorabilia should have been called the 'Mathematician's Bible.'"—A Professor in one of the largest technical schools.

"The Memorabilia is the most interesting book on Mathematics written during the past twenty-five years."—A Professor of Education.

THE MACMILLAN COMPANY
64-66 Fifth Avenue **NEW YORK**

Mitchell Tower

The University of Chicago

Offers instruction during the Summer Quarter on the same basis as during the other quarters of the academic year.

The undergraduate colleges, the graduate schools, and the professional schools provide courses in **Arts, Literature, Science, Commerce and Administration, Law, Medicine, Education, and Divinity**. Instruction is given by regular members of the University staff which is augmented in the summer by appointment of professors and instructors from other institutions.

Summer Quarter, 1920

1st Term June 21--July 28 2d Term July 29--Sept. 3

Detailed announcements will be sent upon application

THE UNIVERSITY OF CHICAGO, Chicago, Ill.

UNIVERSITY OF COLORADO SUMMER QUARTER 1920

First Term, June 14 to July 21. Second Term, July 22 to August 28

Graduate and undergraduate courses in **Arts, Engineering, Law and Medicine, Ophthalmology** (at Denver). Daily open lectures of general interest and educational value.

Courses for teachers, principals, and superintendents in many departments. Many courses counting toward professional requirements of Colorado Certification Law.

⌚ In the foothills of the Rockies; ideal location for summer study and recreation; weekly conducted excursions to points of interest. Boulder is the south gateway to Rocky Mountain National Park.

For Bulletin and further information, address the Registrar,

**THE UNIVERSITY OF COLORADO
BOULDER, COLORADO**

UNIVERSITY OF WISCONSIN SUMMER SESSION 1920

June 28th to August 6th. Law School, June 28th to September 3d

350 Courses. 230 Instructors. Graduate and undergraduate work leading to the bachelor's and higher degrees. **Letters and Science, Medicine, Engineering, Law and Agriculture**, (including **Home Economics**).

Strong courses in Solid Geometry, Algebra, Trigonometry, Analytic Geometry, Calculus, and Mathematical Theory of Investment. Special courses in the Teaching of Secondary Mathematics. Advanced and Research Courses leading to higher degrees.

Special attention will be paid to the needs of high school and college teachers.

Favorable Climate

Lakeside Advantages

One fee for all courses, \$20 except Law (10 weeks) \$32. For detailed announcements, address

Registrar, University, Madison, Wisconsin

Technical and Scientific Publications

Monographs, Theses, Catalogues

Announcements, Reports, etc.

All Kinds of Commercial Work

(Printers of the Bulletin and Transactions of the American Mathematical Society, etc., etc.)

Publishers will find our product ranking with the best in workmanship and material, at satisfactory prices. Our Imprint may be found on a number of high-class Technical and Scientific Books and Periodicals. Correspondence solicited. Estimates furnished.

THE NEW ERA PRINTING COMPANY

Mathematical Special—Premier of the Profession

No Other Typewriter Can Do This

Enables the *amateur* to write as neat appearing letters *from the very beginning* as the experienced operator.

The "Mathematical Special" model of the MULTIPLEX HAMMOND carries 120 distinct characters; about 30 additional ones can be made with simple combinations. "No other typewriter can do this." It has no equal in the mathematical profession.

Aside from these remarkable features, every MULTIPLEX HAMMOND "WRITING MACHINE"

carries two different styles of type, or two languages, in the one machine. "Just Turn the Knob" and change. There are more than fifty different languages in many sizes and styles which can be substituted in a few seconds.

The first paragraph, and the one following, show a few of the 365 different arrangements of types and languages (slightly reduced) *instantly changeable on the Multiplex Hammond:*

A Revelation in Typewritedom

The Multiplex Hammond is unquestionably the most remarkable typewriter in existence. *Why? Because of its versatility.*

Think of it—"Just Turn the Knob" and you can change from ordinary Roman to Italics—INSTANTLY—or from large Gothic to Miniature—INSTANTLY—or from English to Russian—INSTANTLY!

Note the 10 styles of type opposite, all written on the same machine.

Petite - for extra condensing
Miniature - for refined letters
Small Roman - neat business
Script - private correspondence
Medium Roman - general letters
Italic - emphasizing
SPECIAL GOTHIC - CLEAN CUT
Large Gothic - sermons, lectures
Large Roman - sermons, lectures
Clarendon - new, attractive

Writes Anything, Anywhere, Any Way!

Business executives, sales managers, doctors, lawyers, advertising men, writers, druggists, linguists, students—men, women and children in all walks of life—find they can do clearer, cleaner, better work on the Multiplex Hammond. Tell us what your business or vocation is and our Service Department will give you *free*, full details of the particular Multiplex Hammond that is best adapted to your needs.

Our new mathematics folder will be sent to you, free. Write for it *now*—sign and mail the Coupon below, and mail to—
